Microsoft Office
Scheduling
Flexibility
Communication

TECHNICAL PROFICIENCIES

- JavaScript
- jQuery
- Bootstrap
- Testing and debugging
- CSS
- HTML

- Analytical
- Interpersonal
- Wireframing
- Back-end basics

PORTFOLIO PROJECT

My Drum-kit Project   **10/03/2022**
JavaScript | HTML| CSS   https://aaron-july.github.io/Drum-Kit/

The point of this project is to have each key, when pressed, make a corresponding drum noise. It also uses CSS transitions and animations to make the project more interactive for the user. I completed this project earlier in my JavaScript learning phase. I found it quite confusing because I had never used the HTML audio API or the selection of DOM elements using the date-key attribute which can be accessed using the above URL.

Simon Game   **16/04/2022**
JavaScript | HTML | CSS | jQuery   https://aaron-july.github.io/Simon-Game/

Game is a simple game whose goal is for users to repeat the pattern shown by the program. With each round a new step is added to the pattern making, the game much more difficult with every round. Additionally, the program should play a different sound for each field that is activated. The completed project is hosted live and can be accessed using the above URL.
